

# Mapping and Genealogy

Location Matters!

By Craig Rhombs

# Welcome

- **Craig Rhombs**
- **Retired software guy with background in mapping; long time interest in genealogy; “recent” ancestral composition = 3/8 Alsatian/German, 3/8 British Isles; 2/8 Norwegian**
- **<https://281connections.us>**
- **Email: [281connections@gmail.com](mailto:281connections@gmail.com)**

Genealogy class materials by Craig Rhombs are licensed under a [Creative Commons Attribution-ShareAlike 4.0 International License](https://creativecommons.org/licenses/by-sa/4.0/)

# Basic Objectives

- **Review basic mapping technology**
- **Review some sources of historically interesting maps**
- **Review Land Ownership and Description**
- **Examine a few examples showing integration of map information with other data sources**
- **Provide ideas, incite you to look at something new**

# What about you?

- **What are you hoping for?**
- **Why are you interested in maps?**
- **What geographical areas interest you?**
- **What historical eras interest you?**

# Mapping Basics

- “A map is a symbolic depiction which denotes relationships between elements of some space such as objects, regions, and themes. Most maps are drawn to a scale to express a ratio between two or more units of measurement.” - <https://www.mapsofworld.com/>
- Mapping addresses the fundamental problem of how to represent a 3-D (pretty much spherical) world in a 2-D form (like paper)
- Earth’s shape is NOT flat
- Projections
  - Mercator; Universal Transverse Mercator (UTM)
  - Conic

# Mapping Basics (continued)

- **Images are raster representations of digital or drawing/drafting elements**
- **Digital maps**
  - Graphic elements (points, lines, polygons)
  - Non-graphic elements (text, numeric)
  - A map object has both types of properties
  - Spatial analysis (study of objects/entities based on their location & properties)

# Mapping Basics (continued)

- **Example objects**
- **Village: a polygon enclosing residence locations**
- **Locations of flu cases (epidemiology)**
- **Locations of ancestors relative to jurisdictional boundaries (polygons), roads (lines), battlefields (complex), etc.**

# Types of Maps

- **Physical (show physical features)**
- **Political (jurisdictional boundaries)**
- **Economic (consumption, GDP, . . .)**
- **Topographic**
- **Climatic**
- **Thematic (portray a specific topic's patterns)**
- **Road**

# Some Sources of Historical Maps

- **These are examples of general ways to access historical images**
  - <http://www.lib.utexas.edu/maps/histus.html> \*
  - <http://www.davidrumsey.com/> \*
  - <http://www.oldmapsonline.org/> \*
  - <https://dp.la/search?q=maps>
  - [https://en.wikipedia.org/wiki/Historical\\_geographic\\_information\\_system](https://en.wikipedia.org/wiki/Historical_geographic_information_system)
  - <https://dsl.richmond.edu/historicalatlas/>
- **Library of Congress**
  - Overview <https://guides.loc.gov/maps-illustrated-guide/introduction>
  - Sanborn <https://www.loc.gov/collections/sanborn-maps/about-this-collection> \*
  - Marion, OH (example) <https://www.loc.gov/item/2012592377/>
- **Marietta (OH) College Library**
  - <http://cdm16824.contentdm.oclc.org/cdm/search/collection/p16824coll6/searchterm/map/field/all/mode/all/conn/and/order/title/ad/asc>
- **Misc. Info: (guide)** <https://pubs.usgs.gov/fs/2002/0099/report.pdf> \*
- **Your favorite repository for the geography and era you are researching . . .**

# More Examples !

- See gazetteers and atlases slide later
- Original land owners, antique maps:  
<https://historygeo.com/> or via American Ancestors at  
<https://www.americanancestors.org/search/external-databases>
- Boston Library: (digital collections)  
<https://www.leventhalmap.org/> \*
- Get lost in the BYU library:  
<https://guides.lib.byu.edu/maps>
- UK: <https://maps.nls.uk/> \*

# And More!

- <https://apps.nationalmap.gov/viewer/> (recent conditions)
- <https://ngmdb.usgs.gov/topoview/>
- <https://www.mapofus.org/> (US Maps)
- <https://www.newberry.org/> (search for maps)

# Even More (German focus) . . .

- **Misc:**

- Topo maps search (Germany):

<https://www.ancestry.com/search/collections/1294/>

- Historical Atlas of Germany by J. Beidler

<https://hclib.bibliocommons.com/item/show/5910031109>

- **Spatial distribution of names**

- <https://nvk.genealogy.net/> map (explained at <https://wiki-de.genealogy.net/Namensverbreitungskarte>); also <http://geogen.stoepel.net> .

- Irish surnames:

<https://www.barrygriffin.com/surname-maps/irish/>

# Land Ownership

- **Government: How to distribute newly acquired land?**
- **Owners: How to transfer, sell/buy, property?**
- **How to describe a parcel of land?**
  - Public Land Survey
  - Metes and Bounds
  - Units of measure vary by locality and historical era (rods, vara, feet, meters, etc.)

# Public Land Survey (PLS or PLSS)

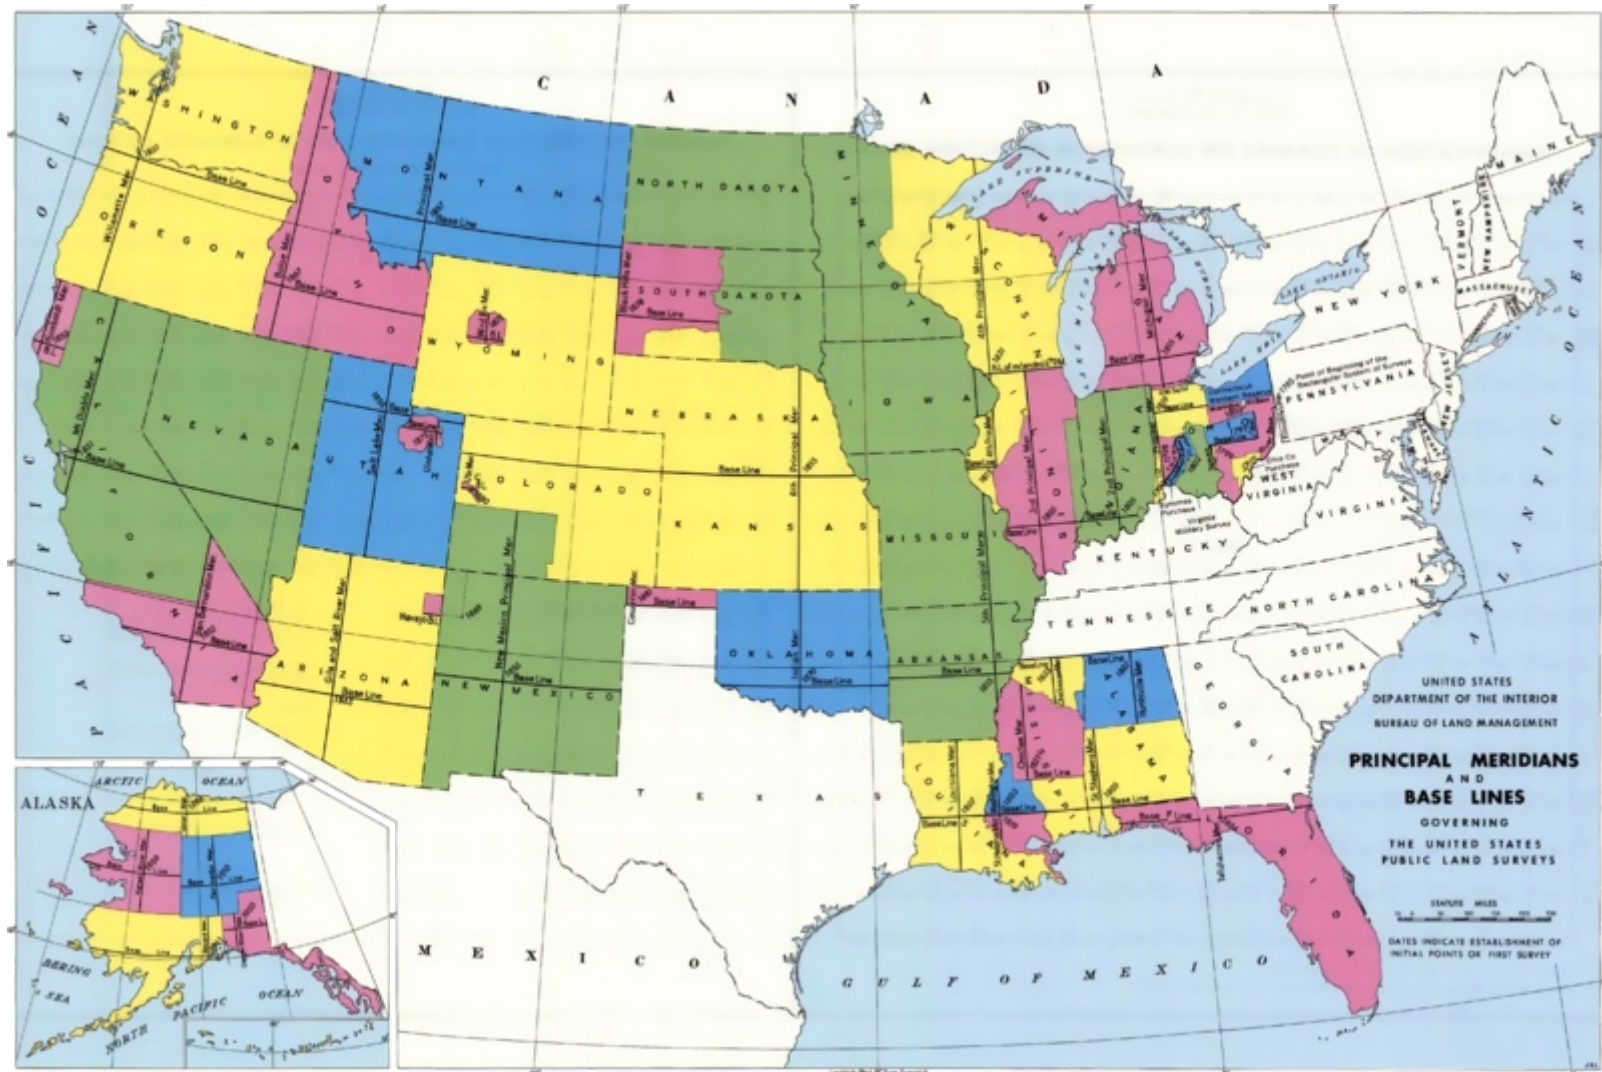

- **Initial purpose = distribution of Fed lands, dates to 1785**
  - [https://en.wikipedia.org/wiki/Public\\_Land\\_Survey\\_System](https://en.wikipedia.org/wiki/Public_Land_Survey_System)
- **Bureau of Land Management (BLM) General Land Office (GLO)**
  - <https://www.glorerecords.blm.gov> \*
  - <https://www.archives.gov/research/land>

# An Aside on Pertinent Laws

- **These may help explain what land your ancestor acquired and when.**
- **Preemption Act of 1841**
  - Sign intent to become a citizen
  - Live on the land for 14 months
- **Homestead Act of 1862**
  - Live on the land 6 mo./year for 5 years
  - Become a citizen
- **Timber Culture Act of 1878**
  - No residence requirement
  - Become a citizen

# Public Land Survey (meridians)

- 37 meridians
- Not 100% regular because of embedded warrants, river shifts, etc.

# Public Land Survey (hierarchy)

- Section, twp, rng, meridian
- Aliquot parts: quarters or halves
- Further subdivisions to locate things like oil wells
- Correction for earth's curvature
- Section 16 for support of schools
- Example for Johannes Rombs: SW1/4, sec 10, twp 120N, rng 69W, 5<sup>th</sup> meridian

# Public land Survey (Ohio is Special)

Ohio is where they  
“warmed up” before they  
proceeded to other areas.

The Official Ohio Land  
Book -

<https://ohioauditor.gov/publications/docs/OhioLandsBook.pdf>

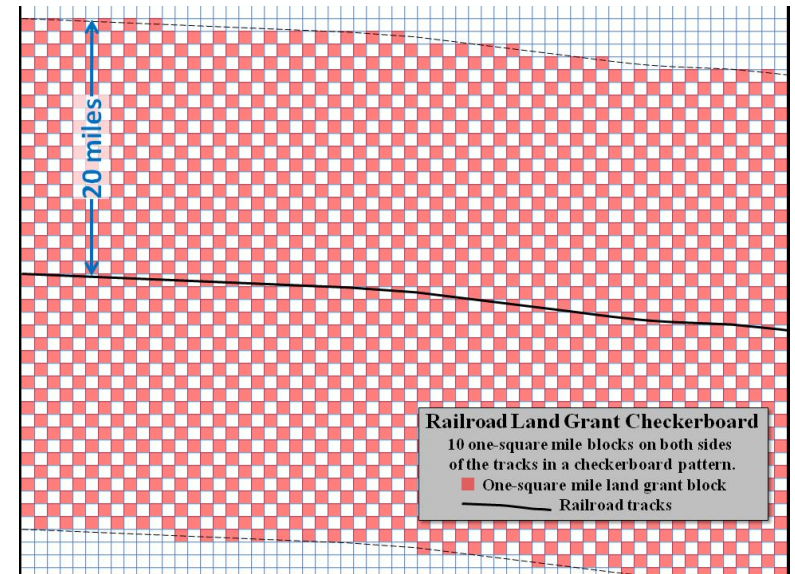

# Grants to Railroads & Others

- **Land Companies (speculators):**

[https://www.familysearch.org/wiki/en/Grants\\_to\\_Land\\_Companies\\_and\\_Railroads](https://www.familysearch.org/wiki/en/Grants_to_Land_Companies_and_Railroads)

- **Railroads:**

<https://www.coxrail.com/land-grants.asp>

# What about the rest of the country?

- It is complicated!
- Retained metes & bounds.
- Many special cases.
- Texas . . .

# Don't forget Texas!

- **Spanish influence**
- **A league of land equals 4,428 acres and a labor, 177 acres, combined they add up to 4,605 acres. This was the amount of a headright (first-class) granted to "all persons except Africans and their descendants, and Indians, living in Texas on the day of the Declaration of Independence... if they be heads of families... and if a single man, 17 years or older, one-third league" (1,476 acres).**
- **Again, it is complicated and beyond this presentation**
  - [https://en.wikipedia.org/wiki/Texas\\_land\\_survey\\_system](https://en.wikipedia.org/wiki/Texas_land_survey_system)
  - <https://s3.glo.texas.gov/glo/history/archives/land-grants/index.cfm>

# Metes and Bounds

- **Traced back to 13<sup>th</sup> Century England**
- **Beginning at a point, . . . , and back to the point of beginning.**
- **Example**

**Beginning at a point on the Southerly line of said Lot 4 distant thereon North 45° East 150.00 feet from the most Southerly corner thereof; thence along said line North 45° East 300.00 feet to the beginning of a tangent curve concave Northwesterly and having a radius of 100.00 feet; thence Northeasterly along said curve through a central angle of 45° 30¢ an arc distance of 79.00 feet to the beginning of a compound curve concave Southwesterly and having a radius of 50.00 feet; . . . thence Southeasterly 68.00 feet to the point of beginning.**

# BLM General Land Office Example

- **Example: Johannes Rombs in SD (immigration in Nov, 1884)**
  - JR patent link

| Image   | Accession                     | Names ↑   | Date       | Doc # | State | Meridian | Twp - Rng   | Aliquots | Sec. # | County |
|---|-------------------------------|---|------------|-------|-------|----------|-------------|----------|--------|--------|
|    | <a href="#">SD0540 .109</a>   |  ROMBS, JOHANNES   | 7/13/1889  | 13933 | SD    | 5th PM   | 120N - 069W | SW¼      | 10     | Faulk  |
|  | <a href="#">SD0730 .190</a>   |  ROMBS, JOHANNES | 10/18/1892 | 4709  | SD    | 5th PM   | 120N - 069W | SE¼      | 9      | Faulk  |
| ---   | <a href="#">SDMTAA 038418</a> |  ROMBS, JOHANNES | 10/4/1900  | 2620  | SD    | 5th PM   | 120N - 069W | E½NW¼    | 9      | Faulk  |
|   |                               |   |            |       |       |          | 120N - 069W | NW¼NW¼   | 9      | Faulk  |
|   |                               |   |            |       |       |          | 120N - 069W | SW¼NW¼   | 9      | Faulk  |

# Metes and Bounds Example

- Land patent to Dolores Garcia in 1838 in TX
- About 2 years after TX Republic established
- About 7 years before statehood
- Note the scale shown in the sketch.

# Integrating Non-Graphic Data

- **This is where real value lies for genealogy, even if done just with images of maps.**
- **Portray (render) some concept in geographic terms to show why location matters**
- **Demonstrates possible unrealized relationships between/among different types of data**
- **Can be used to show temporal changes**

# Temporal Changes

- **Atlas of County Boundaries:**

- <https://digital.newberry.org/ahcb/index.html> \*

- **Mass migrations:**

- <http://www.rootsandroutes.net/roots.htm> (migrations tab)
- [https://www.familysearch.org/wiki/en/United\\_States\\_Migration\\_Internal](https://www.familysearch.org/wiki/en/United_States_Migration_Internal)
- The map section of The Handy Book for Genealogists

- **National Historical Geographic Information System**

- <https://www.nhgis.org/> (complicated)

- **Example of land ownership changes in SD:**

- 1910:  
<http://www.historicmapworks.com/Map/US/50159/Freedom+Township/Faulk+County+1910/South+Dakota/>
- Settlers: Faulk County, SD, courthouse
- See next page

# Temporal Change Example - SD

Settlers c.1890

FREEDOM

HOMESTEAD TOWNSHIP MAP

TOWNSHIP: 120 N.

RANGE: 69 W.

| A.E.<br>Ward<br>160   |                      | School<br>160            | Minnie<br>O'Neil<br>160 |

# Another Example Based on Patents

- **Campbell County, SD**
- **Lat 19<sup>th</sup> century**
- **Illustrates a group migration from PA**
- [https://281connections.us/281connections\\_Wiki/South\\_Dakota\\_Families/Loy-Allen/meadville-migration.pdf](https://281connections.us/281connections_Wiki/South_Dakota_Families/Loy-Allen/meadville-migration.pdf)

# USGS Place Names (GNS/GNIS)

- Root: <https://www.usgs.gov/core-science-systems/ngp/board-on-geographic-names>
- Foreign: <https://www.usgs.gov/us-board-on-geographic-names/foreign-names>
- Domestic:  
<https://www.usgs.gov/core-science-systems/ngp/board-on-geographic-names/domestic-names>
- Domestic Download Example:  
<https://www.usgs.gov/core-science-systems/ngp/board-on-geographic-names/download-gnis-data>  
<https://edits.nationalmap.gov/apps/gaz-domestic/public/search/names>
- Use quick link to “Download Domestic Names”
- Choose state, then a delimited file will be downloaded.
- Open the file inside the compressed file using your favorite spreadsheet software like LibreOffice Calc or Excel. (File contents are “pipe” delimited records.)
- Filter the contents based on heading categories to select the named features you want to see (e.g., cemeteries)
- Note lat/long coordinates and create your own scatter plot (map) that can be overlaid on a Google Earth rendering.
- I have used this approach to find cemeteries in an area.

## U.S. Board on Geographic Names

HOME | MEMBERSHIP | RESOURCES | **DOMESTIC NAMES** | FOREIGN NAMES | ANTARCTIC NAMES | UNDERSEA FEATURES

### Home

The U.S. Board on Geographic Names (BGN) is a Federal agency established in its present form by Public Law 75-406 in 1947 to maintain uniformity in the naming of geographical features. The BGN comprises representatives of various Federal agencies and provides information, population, ecology, and management data.

## Domestic Names

HOME | MEMBERSHIP | RESOURCES | **DOMESTIC NAMES** | FOREIGN NAMES | ANTARCTIC NAMES | UNDERSEA FEATURES

The BGN's Domestic Names Committee provides information relating to domestic names; new name and name change proposals; the principles and policies by which it reviews name proposals; past and pending cases; and meeting schedule are available.

- [Search Domestic Names](#)
- [Download Domestic Names](#)
- [Principles, Policies, and Procedures](#)
- [Propose or Change a Domestic Name](#)
- [Minutes](#)
- [Quarterly Review List](#)
- [Meeting Schedule](#)

## Download GNIS Data

HOME | MEMBERSHIP | RESOURCES | **DOMESTIC NAMES** | FOREIGN NAMES | ANTARCTIC NAMES | UNDERSEA FEATURES

The Board on Geographic Names has many files available for download. Please contact us for more information and metadata for specific information regarding each file. If you have questions regarding downloading please view the Download Data section of the How Do I? page. If you have any questions regarding downloading please send an email to [gnis\\_manager@usgs.gov](mailto:gnis_manager@usgs.gov)

**The GNIS will be down beginning 3 pm MT Friday, October 25 through Sunday October 27. Users will also be unable to download files during this time. The system is expected to be back online on Monday, October 28.**

All files are pipe-delimited text files and were last updated September 1, 2019. Click on the link to view the file's metadata: [text](#) | [xml](#)

[GNIS File Formats](#)

**State, Territories, Associated Areas of the United States**

- [National File](#) (all features in one file)
- [All States File](#) (individual state files in a single .zip file)
- Individual State Files:** [Alabama](#)

# The Great Migration

- “In early 2015 I had just completed work on **Great Migration Directory**, which contained abbreviated entries for each known head of household or isolated individual participant in the Great Migration. The result was an alphabetical listing of about 5,700 families or individuals. For about 1,800 of the entries, the English origin (defined as the last known residence in England before migration) was known.” - Robert Charles Anderson
- The parish map is at <https://www.americanancestors.org/publications/great-migration-study-project/parish-map>

LivingDNA

Great migration

# Google Earth

- **Installing (browser versus pro for desktop)**

- <https://www.google.com/earth/versions/>
- Demands chrome browser!
- Pro for Desktop: Linux, Windoz, MacOS
- iOS, Android apps?

- **Navigating Pro**

- Search, places, layers
- Public land survey data (<http://www.earthpoint.us/>)
- Saving data (my places)
- Saving KML (<https://developers.google.com/kml/>); save to cloud, share link that others can use (web version - settings, allow kml import, then go to my places to import)
- Integrating old maps (add, image overlay, etc)
- Note: KMZ file is a zipped version of a KML file.

# Adding Public Land Survey Data

- See <http://www.earthpoint.us/> and follow instructions. May not be free.

# Integrate with Your Timeline

Migration of the Maternal Ancestors of Marian Loy from the 17<sup>th</sup> through the 19<sup>th</sup> Centuries
